

INNOVATING COMFORT

CORPORATE PROFILE

SANDEN CORPORATION

Let us Develop with Wisdom and Prosper in Harmony

Having the founding spirit of 'Let us Develop with Wisdom and Prosper in Harmony' as a basic philosophy, Sanden has continually been building the corporate culture of challenge and innovation since its establishment in 1943.

This means that we should use our intelligence in combining our developmental and pioneering abilities to win prosperity for us all, and this is based on "The principles that a Company is as Good as the People it Keeps" which means team work among employees and within the organization is the basis of the company's prosperity.

Management Principles

Since the company's founding, our management Principles have been the cornerstone of our employee's activities.

- Satisfy our customer's needs with high quality products.
 - Contribute to the social and cultural improvement of community through business activity.
 - Build a company of which all are proud, through the effort of self-motivated employees.
-

The extensive mountains with lush greenery. The blue clear sky. A blue flash streaking far in the distance through such a beautiful scenery represents the Sanden-created 'comfort' that opens up a new era forever and ever.

We are pursuing next-generation Air Conditioning Systems that are friendly to people and the Earth. Sanden Group was quick to respond to customer needs for electrification of vehicles, and its Automotive Air Conditioning System Products and Automotive Air Conditioning Compressor Products are used by automakers, construction machinery manufacturers, and agricultural machinery manufacturers worldwide.

Automotive Air Conditioning Systems

Mainline Products / HVAC* Units, Heat Pump System

We globally manufacture and sell various components that make up Automotive Air Conditioning Systems. With environmental technologies as our core competence, we have earned the trust of the world leading automakers, construction machinery manufacturers, and agricultural machinery manufacturers.

*HVAC : Heating, Ventilating and Air-Conditioning

Compressor for Automotive Air Conditioning

Mainline Products / Electric Compressors, Variable Displacement Compressors

We manufacture and sell Compressors, the heart of Automotive Air Conditioning Systems, on a global scale. In recent years, we have earned trust in the development of environmental technologies, especially for electric vehicles.

Advanced Technology Development

We Research and Develop next generation technologies and products. We are actively engaged in the development of new products and technologies to create new Sanden products, and in order to develop new markets, we are actively promoting research and development.

Main Products

Automotive Air Conditioning System Products

System Products

Heat Pump System

Components

HVAC Units

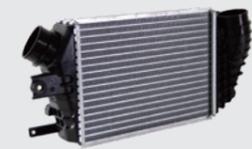

Condensers

Evaporators

Other Product

Intercoolers

Heater Cores

Electric Coolant Heaters

Pipes for Air Conditioning

Compressor Products for Automotive Air Conditioning

Electric Compressors

Swash Plate Type Variable Displacement Compressors (PX series)

Wobble Plate Type Variable Displacement Compressors (SDV/C series)

Wobble Plate Type Fixed Displacement Compressors (SD series)

Scroll Type Fixed Displacement Compressors (TR series)

CO₂ Compressors

ITMS | Integrated Thermal Management System

Sanden is also developing new technologies. The automotive industry is accelerating electrification of vehicles due to increasing environmental awareness and tightening of environmental regulations across the world. Since electric vehicles cannot utilize exhaust heat from the engine, the power consumption of the drive battery increases during cooling and heating, reducing the cruising distance. This is a major challenge for electric vehicles to be solved. Sanden will contribute to extending the cruising distance and improving occupant comfort by effectively utilizing the thermal energy of electric vehicles in an integrated manner.

Advantages of Integrated Thermal Management System

- Energy is saved by recovering and reusing exhaust heat from motors and inverters.
- Improved battery performance through optimal cooling and heating.
- Equipped with a high-efficiency heat pump and a compact, lightweight electric coolant heater.
- Provides optimal thermal management and comfort for the entire air conditioning and other cooling and heating devices.

Company Profile/History

Company Profile

Company name	SANDEN CORPORATION
Established	July 30, 1943
Capital	21.7 Billion Yen
Business	Automotive Systems Business ▪ Automotive Air Conditioning Systems ▪ Compressors for Automotive Air Conditioning
Consolidated annual sales	183.8 Billion Yen (Fiscal year 2024*) <small>*Sanden's fiscal year ends in December</small>
Number of employees on a consolidated basis	Consolidated : 5,344 (As of December 31, 2024)
Major customers	VW, Mercedes-Benz, RENAULT, NISSAN, JAGUAR LAND ROVER, VOLVO, STELLANTIS, GM, HONDA, SUZUKI, SAIC, TRATON, KOMATSU, KOBELCO
Group companies	Overseas: 22 countries and region 46 business locations (As of December 31, 2024)

Domestic Bases

Headquarter

Where Sanden was founded in 1943. (Located in Isesaki City, Gunma)

Sanden Global Center (SGCT)

The laboratory has many experimental facilities as a base for advanced and fundamental technology development. (Located in Isesaki City, Gunma)

Yattajima Plant

The base where the components of Automotive Air Conditioning Systems and the Compressors for Automotive Air Conditioning are manufactured. Yattajima Plant acts as a mother plant supporting production activities at Sanden's global manufacturing bases. (Located in Isesaki City, Gunma)

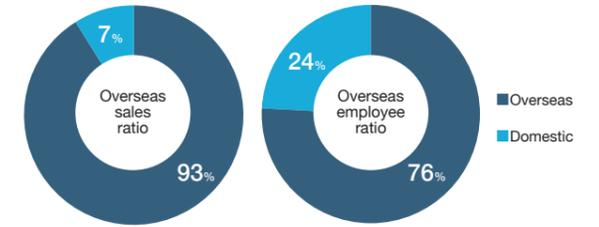

Sanden Forest and Akagi Plant

In 2002, Sanden built the Akagi Plant, an environmentally friendly plant that can be used in the 21st century, in a forest created using near-natural construction methods for the first time by a private company, based on the concept of "the Coexistence of the Environment and Industry without Contradiction". (Located in Maebashi City, Gunma)

Global Network

46 business locations are deployed in 22 countries and region.

Sales figures are for FY2023 and are categorized by product destination. Employee numbers are as of December 31, 2023.

1943

Established Sankyo Electric Company at 20 Kotobukicho, Isesaki City, Gunma

1962

Listed on the Second Section of Tokyo Stock Exchange

1973

Listed on the First Section of Tokyo Stock Exchange and renamed trademark to Sanden

1974

Established Sankyo International (U.S.A.), Inc. (Currently Sanden International (U.S.A.), Inc.) in USA

1977

Established Sankyo International (Singapore) Pte. Ltd. (Currently Sanden International (Singapore) Pte. Ltd.) in Singapore

1982

Changed the company name to Sanden Corporation

1995

Established Sanden Manufacturing Europe S.A.S. in France

1997

Absorbed the subsidiary Sanden Sales Co., Ltd. and Sanden International Co., Ltd.

2000

Established Tianjin Sanden Automotive Air Conditioning Co., Ltd. in China

2002

Completed Sanden Forest and Akagi Plant

2004

Established Sanden Manufacturing Poland sp. z o.o. in Poland

2008

Opened Sanden Global Center (SGCT)

2015

Transitioned to a holding company structure and changed its company name to Sanden Holdings Corporation

2019

Transferred shares of Sanden Retail Systems Corporation

2021

Signed a share subscription agreement with Hisense Group

2022

Changed the company name to Sanden Corporation

2023

80th Anniversary of the establishment of Sanden

1940

1948

Started production of Bicycle Dynamo Lights

1950

1958

Started production of Ice Cream Refrigerating Stockers, Freezing and Refrigerating Showcases

1960

1961

Started production of Fountain-Type Juice Vending Machines

1970

1963

Started production of Pot-Type Oil Stoves

1971

Started production of Wobble Plate Type Fixed Displacement Compressors (SD series) first in the world

1980

1981

Started production of Scroll Type Fixed Displacement Compressors (TR series) first in the world

1991

Started production of Condensers

1990

1998

Started production of Intercoolers

2000

2001

The cumulative global production of Compressors reached 100 million units

2005

Entered Eco-Cute business

2000

2009

Started production of Electric Compressors

2012

Started production of Electric Coolant Heaters

2010

2016

The cumulative global production of Compressors reached 300 million units

2017

Started production of Heat Pump System

2023

Sanden International (U.S.A.), Inc. started producing Electric Compressors Established production platforms in 4 regions : Japan, China, Europe, Americas

2020

2024

The cumulative global production of Compressors reached 400 million units
