## Achieved Caterpillar's Supplier Excellence Recognition Excellent level for three consecutive years

Caterpillar, Inc., the world's largest manufacturer of construction and mining equipment, diesel and natural gas engines, and industrial gas turbine engines, has awarded Sanden Corporation with SER certification achieving Excellent, the highest honor for three consecutive years in recognition of its SER (Supplier Excellence Recognition) program.

Since first receiving the SQEP (Supplier Quality Excellence Process) award, SER's predecessor, in 2014, Sanden Group has steadily advanced through the ranks, receiving Bronze, Silver, Gold, and Platinum. Following the transition to the SER system, we have continued to earn top-tier evaluations. We are proud to have achieved the highest rating for 10 consecutive years, with this latest recognition.

SER is a program through which Caterpillar recognizes suppliers who have demonstrated world class in the areas of quality and velocity along with other requirements.

One of our founding principles has always been to “Satisfy our customers’ needs with high-quality products.”

As the Sanden Group continues to grow globally, we remain committed to meeting our customers’ diverse needs by providing top-quality products, systems, and services. We are evolving into a full-solution system supplier.
