Sanden Corporation

SIE took the stage at the European Decarbonization Summit.

~Introduced Sanden's initiatives at Net ZERO Energy Sourcing & PPA Summit 2025~

Sanden International Europe (SIE), Sanden Corporation's European base (headquartered in Isesaki City, Gunma Prefecture), presented Sanden's decarbonization initiatives at the "4th Net ZERO Energy Sourcing & PPA Summit," held in Frankfurt, Germany, on September 10-11, 2025.

● Discussions and Exchanges on Decarbonization

This summit convenes corporate energy managers and power suppliers to accelerate decarbonization efforts. The forum was designed as a small yet dynamic venue for lively exchange, facilitating the sharing of practical case studies and valuable networking opportunities.

Participants represented a range of industries, including manufacturing and data centers, and discussed topics such as long-term power purchase agreements (PPAs), implementing renewable energy at their facilities, utilizing storage technologies like batteries, and more efficient energy procurement methods. The program also featured case studies, peer discussions, and practical insights on the latest initiatives and

future outlook for achieving net-zero.

● SIE's Presentation Overview

Our company's sustainability officer Head of Sustainability for Europe at SIE delivered a presentation on Sanden's sustainability strategy.

Key points of the presentation

- Background and key drivers for sustainability initiatives
- Future potential in energy procurement and decarbonization
- Addressing changing regulations and customer requirements
- Company-wide approach integrating ESG
(Environmental, Social, and Governance)
Executing strategy and efforts to translate goals into tangible outcomes

● Sustainability Initiatives and Future Outlook

Our company's sustainability officer emphasized that sustainability is not only about regulatory compliance, but also an opportunity to enhance the future viability of the business, promote innovation, and build corporate resilience—the ability to adapt to change and achieve sustainable growth. She also discussed the Sanden Group's commitment to advancing electrification through environmentally conscious products and contributing to the realization of a sustainable mobility society through collaboration with customers and partners.

This presentation clearly demonstrated our strong commitment to sustainability and further clarified our role in advancing decarbonization and the utilization of low-carbon energy within the automotive industry. Moving forward, we will continue to work as the Sande Group to advance these initiatives, contributing to the

realization of a sustainable society and creating value for future generations.
